---

`alpineData`*GAlignmentPairs for four samples from the GEUVADIS project*

---

**Description**

FASTQ files for four RNA-seq samples from the GEUVADIS project were downloaded, aligned and constructed as `GAlignmentPairs`, according to the steps presented in `inst/scripts/make-data.R`

**Usage**

```
ERR188297(metadata=FALSE)
ERR188088(metadata=FALSE)
ERR188204(metadata=FALSE)
ERR188317(metadata=FALSE)
```

**Arguments**

`metadata` logical value indicating whether metadata only should be returned or if the resource should be loaded. Default behavior(`metadata=FALSE`) loads the data.

**Format**

`GAlignmentPairs`

**Value**

These accessor functions return `GAlignmentPairs` objects

**Source**
