**Usage**
```
readGMT(file)
```
**readGMTnames**

**Arguments**

- **file**  
  Path to GMT file

**Details**

The returned data frame includes only terms and genes. If you want another data frame with terms and names, then see readGMTnames.

**Value**

Data frame of term-gene associations

**Examples**

```r
#readGMT(system.file("extdata","my_gmt_file.gmt", package="rWikiPathways"))
#readGMT("path_to_your_gmt_file.gmt")
```

**readGMTnames**  
*Read GMT File for Names*

**Description**

Reads any generic GMT file to produce a data frame of term-name associations useful in enrichment analyses and other applications.

**Usage**

```r
readGMTnames(file)
```

**Arguments**

- **file**  
  Path to GMT file

**Details**

The returned data frame includes only terms and names. If you want another data frame with terms and genes, then see readGMT.

**readPathwayGMT**  
**Read Pathway GMT File**

**Description**

Reads a WikiPathways GMT file to produce a data frame of pathway-gene associations useful in enrichment analyses and other applications.

**Usage**

readPathwayGMT(file)

**Arguments**

- **file**: Path to GMT file

**Details**

The returned data frame includes pathway name, version, identifier, and organism. The gene content is provided as NCBI Entrez Gene identifiers. The input file can be retrieved by using downloadPathwayArchive(organism="Homo sapiens", format="gmt").

**Value**

Data frame of pathway-gene associations

writeGMT  Write GMT File

Description
Writes a GMT (Gene Matrix Transposed) file from a data frame.

Usage
writeGMT(df, outfile)

Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>df</td>
<td>Data frame with columns ordered as Identifiers, optional Description column and Genes. Identifiers must be first and Genes must be last.</td>
</tr>
<tr>
<td>outfile</td>
<td>Path to output GMT file</td>
</tr>
</tbody>
</table>

Details
The input data frame must include at least two columns: Identifiers (first column) and Genes (last column). The Identifiers will be duplicated to fill the Description column in the output GMT file if none is provided. If more than three columns are provided, then the first n columns will be concatenated with number of columns.

Value
None
