affylmGUI Package Vignette

James Wettenhall

April 6, 2004

affyalmGUI is a Graphical User Interface for doing Affymetrix analysis with the limma package (LInear Models for MicroArray Data). For Affymetrix analysis with the limma package, see limmaGUI.

The affyalmGUI Documentation can be accessed online or by installing the affyalmGUI package locally. Then at the R prompt you can type

```r
> if (interactive())
```

or alternatively

```r
> if (interactive())
+   {
+     library(affyalmGUI)
+     affyalmGUIhelp()
+   }
```

or alternatively

```r
> if (interactive())
+   help.start()
```

and follow the links the affyalmGUI package help.
