FDb.UCSC.tRNAs
March 27, 2024

Description
This package loads one or more FeatureDb objects. Such FeatureDb objects are an R interface to prefabricated databases contained by this package.
The names of any objects exposed by this package indicate the origin and resources exposed. So for example TxDb.Hsapiens.UCSC.hg19.knownGene would be a TranscriptDb object, of Homo Sapiens data from UCSC build hg19 based on the knownGene Track.

Note
This data package was made from resources at UCSC on 2012-09-10 13:15:01 -0700 (Mon, 10 Sep 2012) and based on the hg19 genome based on the tRNAs table

Author(s)

Examples
## load the library
library(FDb.UCSC.tRNAs)
## list the contents that are loaded into memory
ls('package:FDb.UCSC.tRNAs')
## show the db object that is loaded by calling it's name
FDb.Hsapiens.UCSC.hg19.tRNAs
