Version 1.24.0
Date 2022-11-07
Title SummarizedExperiment for the microRNAome project
Description This package provides a SummarizedExperiment object of read counts for microRNAs across tissues, cell-types, and cancer cell-lines. The read count matrix was prepared and provided by the author of the study: Towards the human cellular microRNAome.

**MicroRNAome Data**

**Description**

Read counts per miRNA for the microRNAome collection of RNA-Seq experiments

**Usage**

```r
data("microRNAome")
```

**Format**

SummarizedExperiment

**Details**

Small RNA-seq data on 2406 samples from the Sequence Read Archive (SRA) processed using the miRge3 pipeline.

**Source**

Read count matrix prepared and provided by authors of the study

**Examples**

```r
data(microRNAome)
## the microRNAome SummarizedExperiment object contains only one matrix
## in the assays field: a matrix of miRNA counts
